

페이블 5 vs 오퍼스 4.8 3 탄

스토리보드 + 비디오 프롬프트 원문 모음 (스킬 미사용, 순수 모델 능력)

AI ASTRA · 격차는 기획입니다

Scene 1 — RINA · 다운힐 통학 스프린트

① 오퍼스 4.8 버전

[SEEDANCE 2.0 · SCENE 1 "RINA – DOWNHILL COMMUTE SPRINT"]

15s · 16:9 · 720p · 24fps · ONE-PUSH ACCELERATION ARC

STYLE (locked, every frame):

Modern Japanese TV anime – bold rough ink outlines, hard high-contrast cel shading, gritty screen-tone, punchy saturated color, strong speed lines. Early-morning golden city light, warm haze. NOT 3D, NOT photoreal, no style drift.

CHARACTER (locked): RINA, 17yo skater girl – dark chestnut windswept ponytail, navy blazer open over grey hoodie, pleated skirt over black leggings, knee pads, chunky white-red skate sneakers, backpack on one shoulder, small cheek bandage, on a skateboard. Same face + outfit every frame. Solo, no other named characters.

CAMERA LOGIC: continuous downhill momentum; each cut hands its END position to the next cut's START (top of hill → alley → stair rail → curve → straight → bus), so the run reads as one unbroken acceleration. Tempo builds; only the bus leap slows.

BEATS (timecoded):

- 0.0-1.5 Medium. RINA steps on the board on her doorstep steps, hard kick-push off, morning golden backlight. SFX: board slap, wheels catch.
- 1.5-3.0 Wide establishing from a high vantage, city sprawl below; she drops into the downhill and accelerates, camera pushes in behind.
- 3.0-4.0 Rear low tracking, ponytail + blazer whipping, dense speed lines, wheels humming – velocity beat.
- 4.0-5.5 Side whip-pan: tight alley slalom, weaving between parked cars and poles, near-miss with a trash can.
- 5.5-7.0 Low follow: she pops onto a stair handrail – board grind, orange sparks streaking, metal screech.
- 7.0-8.5 Wide dramatic: sharp curve, hard power-slide drift, rear wheels breaking loose, tire smoke, she counter-steers out.
- 8.5-10.5 Long lens: final straightaway, a city bus pulling away from its stop ahead; she tucks low and sprints-pushes for max speed.
- 10.5-13.0 Hero leap into a brief SLOW-MOTION peak: she launches off a bump, kick-ups the board and catches it, sailing toward the bus's rear.
- 13.0-15.0 Lands gripping the bus's back rail, snaps back to real-time; relieved grin as the city streaks past behind her.

DIALOGUE (only line): "휴... 아슬아슬 세이프."

AUDIO: BGM INCLUDED – driving upbeat electro/rock chase cue that RISES with the acceleration, a beat-drop synced to the bus leap, quick resolve at the grin. Layered

diegetic SFX: wheels on asphalt, wind rush, grind screech + sparks, tire skid, bus engine, rail clank. Korean line only as written. No other dialogue.

NEGATIVE: no subtitles, no on-screen text, no watermark, no logos, no readable signs, no photoreal, no 3D-CGI look, no face morphing, no multiple RINAs, no extra/deformed limbs, no outfit color change, no lighting drift to night, no camera cut jumps, no floaty weightless motion.

② 페이지블 5 버전

[SEEDANCE 2.0 · SCENE 1 "RINA – DOWNHILL SPRINT"]

15s · 16:9 · 720p · 24fps · STAKES → FLOW → SILENT PEAK → DROP

STYLE (locked, every frame):

Modern Japanese TV anime – bold rough ink outlines, hard high-contrast cel shading, gritty screen-tone, punchy saturated color. Early-morning golden light.

Anime speed idioms ALLOWED and encouraged: dense speed lines, smear frames on the fastest motions, a single white impact-flash frame on hard landings.

NOT 3D, NOT photoreal, no style drift.

CONTINUITY LOCKS (non-negotiable):

- TRAVEL VECTOR: RINA always moves LEFT → RIGHT across the frame, every beat. Never flip screen direction; this is what makes eight beats read as one downhill.
- LIGHT: morning sun from camera-LEFT the entire shot; shadow direction constant.
- CHARACTER: RINA per attached sheet – chestnut windswept ponytail, navy blazer open over grey hoodie, pleated skirt over black leggings, knee pads, white-red skate sneakers, backpack on one shoulder, cheek bandage. Same face/outfit every frame.
- SPEED GAUGE: hair, blazer and skirt flutter scale WITH velocity – calm at 0s, violent by 8s. Cloth is the speedometer.

BEATS (timecode · lens · action):

- 0.0-2.0 35mm push-in at the hill crest. RINA sees the bus pulling away far below (the stakes, shown not told), jaw sets, she DROPS IN – camera tips over the crest edge WITH her (stomach-drop move). SFX: wind swells.
 - 2.0-3.2 FPV 24mm board-height ground-skim; asphalt texture streaking, telephone poles whipping through the extreme foreground. Raw acceleration.
 - 3.2-4.6 Side-tracking slalom between parked cars – foreground occlusion whips (car roofs slice the frame), smear frames on the quickest weaves.
 - 4.6-6.0 Low follow, 10° dutch tilt: stair-rail grind, orange sparks streaming, metal screech; she lands with ONE white impact-flash frame.
 - 6.0-7.4 Wide: hairpin power-slide, horizon tilts with the drift, tire smoke; her eyes lock onto the bus at the stop below. Music tightens.
 - 7.4-9.5 Long-lens compression down the final straight: bus doors closing, heat shimmer stacking the distance; she tucks flat, max cadence pushes.
 - 9.5-12.5 THE LEAP – BGM CUTS TO SILENCE. Overcranked slow motion: she launches off the curb bump, kicks the board up and catches it midair, backlit silhouette against the sun flare, only wind and a single heartbeat on the track.
 - 12.5-15.0 BEAT-DROP exactly on her hands catching the bus's rear rail – snap back to real time, world sound rushes in, relieved grin as the city streaks past.
- DIALOGUE (only line): "휴... 아슬아슬 세이프."

End frame: RINA left-third on the bus rear, morning light, exhaust shimmer.

AUDIO ARCHITECTURE: BGM included – driving electro-rock that accelerates WITH her (tempo maps to speed), tension riser through 6.0-9.5, HARD MUTE at 9.5 (silence + wind + one heartbeat), full beat-drop at 12.5 landing, short triumphant outro. Diegetic under it all: wheel hum scaling with speed, grind screech, drift skid, bus air-brake hiss, rail clank. Korean line only as written.

NEGATIVE: no subtitles, no on-screen text, no watermark, no logos, no readable signs, no photoreal, no 3D-CGI look, no face morphing, no duplicate RINA, no extra or deformed limbs, no outfit/color change, no direction flips (never right-to-left), no lighting drift, no floaty physics, no dead-air pacing.

Scene 2 — JUNO · 지하철 막차 환승

① 오퍼스 4.8 버전

[SEEDANCE 2.0 · SCENE 2 "JUNO — LAST TRAIN TRANSFER"]
15s · 16:9 · 720p · 24fps · ACCELERATING SPRINT ARC

STYLE (locked, every frame):

Photoreal cinematic live-action — handheld kinetic camera, cool fluorescent subway light with warm sodium accents, shallow depth of field, subtle film grain, modern Korean thriller color grade. Believable physics and cloth. NOT anime, NOT 3D CGI, no style drift. Original person, not a celebrity likeness.

CHARACTER (locked): JUNO, early-30s office worker per attached reference sheet — short black slightly disheveled hair, light stubble, white dress shirt with loosened navy tie, sleeves pushed up, charcoal trousers, company lanyard, messenger bag worn across the chest, suit blazer clutched in one hand. Same face + outfit every frame. Background crowd stays anonymous, faces soft.

CAMERA LOGIC: continuous forward momentum through one transfer corridor; each cut hands its END position to the next cut's START (corridor → escalator → gates → platform stairs → screen doors), so nine beats read as one unbroken dash. Handheld shake scales up with his speed.

BEATS (timecoded):

- 0.0-1.5 Wide burst: JUNO rounds into the transfer corridor, glances up at the departure board, eyes widen — hard sprint start, handheld kicks in.
SFX: shoe squeak, echoing hall.
- 1.5-3.0 Medium tracking: weaving upstream through rush-hour crowd shoulders, "죄송합니다!" energy without dialogue, bag swinging.
- 3.0-4.5 Low tracking: hurdles a rolling suitcase dragged across his path, stumbles half a step, recovers without losing speed.
- 4.5-6.0 Vertical follow: takes the escalator two steps at a time past standing commuters, blazer flapping.
- 6.0-7.5 Whip pan: grabs a pillar at the corner and slingshots around it, shoes skidding on tile.
- 7.5-9.0 Side profile: vaults the ticket gate in one clean hurdle, lanyard flying.
- 9.0-10.5 High angle: leaps down the last three platform steps, knees bending deep on the landing, train doors chiming ahead.
- 10.5-13.0 SLOW-MOTION peak: the platform screen doors sliding shut — he throws the messenger bag through the gap first, then dives sideways after it, shirt rippling, fluorescent flare streaking.
- 13.0-15.0 Interior settle: he tumbles onto the train floor as the doors seal behind him; sprawled against the seat edge, chest heaving, relieved half-laugh.
DIALOGUE (only line): "하아... 땀다."
End frame: JUNO slumped left-third, window lights streaking as the train moves.

AUDIO: BGM INCLUDED — tense percussive electronic cue that accelerates with the sprint, riser through the gate vault, hard hit synced to the slow-mo dive, quick warm resolve on the relieved laugh. Diegetic under: footfalls on tile, crowd murmur,

escalator hum, gate beep, door-closing chime, train pull-away rumble.
Korean line only as written. No other dialogue.

NEGATIVE: no subtitles, no on-screen text, no watermark, no logos, no readable station signs, no anime or CGI look, no face morphing, no duplicate JUNO, no extra or deformed limbs, no outfit change, no lighting shifts, no camera cut jumps, no crowd faces in sharp focus, no floaty physics.

② 페이지블 5 버전

[SEEDANCE 2.0 · SCENE 2 "JUNO – LAST TRAIN TRANSFER"]

15s · 16:9 · 720p · 24fps · PARALLEL-EDIT SUSPENSE: RUNNER vs CLOSING DOORS

STYLE (locked, every frame):

Photoreal cinematic live-action – handheld kinetic camera, cool fluorescent subway light with ONE warm sodium accent (constant direction), shallow depth of field, subtle film grain, modern Korean thriller grade. Believable physics and cloth.
NOT anime, NOT 3D CGI, no style drift. Original person, not a celebrity likeness.

CONTINUITY LOCKS (non-negotiable):

- EDIT STRUCTURE: two lines cross-cut. A-line = JUNO sprinting. B-line = the train's platform screen doors (the ticking clock). B appears exactly 3 times, each tighter and more urgent than the last.
- TRAVEL VECTOR: JUNO always moves LEFT → RIGHT. Train doors always sit frame-RIGHT, so his motion vector literally points at the goal. Never flip direction.
- CHARACTER: JUNO per attached sheet – short black disheveled hair, light stubble, white shirt + loosened navy tie, sleeves up, charcoal trousers, lanyard, messenger bag across chest, blazer in hand. Same face/outfit every frame.
- SPEED GAUGE: tie, lanyard and blazer flutter scale WITH his speed; sweat sheen builds over the 15 seconds. Crowd faces stay soft/anonymous.

BEATS (timecode · line · action):

- 0.0-1.2 [B] Calm static wide: the train already AT the platform, doors open, last passengers stepping in. The prize, shown first. Ambient hum only.
- 1.2-2.4 [A] Handheld IGNITES: JUNO bursts into the transfer corridor L→R, eyes locked down-frame-right. BGM starts – low percussive pulse.
- 2.4-3.8 [A] Tracking through rush-hour crowd moving the OPPOSITE way; foreground shoulders and pillars slice the frame as occlusion whips.
- 3.8-4.6 [B] Tight insert: warning lamp above the doors starts blinking – FIRST door chime. BGM ducks under the chime, then returns harder.
- 4.6-6.2 [A] Long-lens compression: two steps at a time up the escalator past standing commuters, blazer flapping violently now.
- 6.2-7.6 [A] Whip pan: pillar-grab slingshot around the corner, straight into a dutch-tilted one-hand vault over the ticket gate, lanyard flying.
- 7.6-8.4 [B] Insert: conductor's check, doors BEGIN sliding – SECOND chime, faster. BGM tension riser underneath.
- 8.4-10.2 [A] High angle: three-step leap down to the platform, deep landing roll back up to full sprint without losing frame-right momentum.
- 10.2-13.0 [A+B converge] The gap narrowing – he hurls the messenger bag through first, then dives sideways after it in OVERCRANKED SLOW MOTION.

BGM FULLY MUTES: only one heartbeat and the THIRD chime, stretched.
13.0-15.0 BEAT-DROP the instant his shoulder hits the train floor – doors seal behind him, real-time snaps back, world sound rushes in. Sprawled against the seat edge, chest heaving, a relieved half-laugh.
DIALOGUE (only line): "하아... 탔다."
End frame: JUNO slumped left-third, window lights streaking as the train pulls away.

AUDIO ARCHITECTURE: BGM included – low percussive electronic pulse that accelerates with A-line speed; DUCKS under each of the 3 door chimes (the chime IS the clock); tension riser 7.6→10.2; FULL MUTE 10.2-13.0 (heartbeat + stretched chime only); hard beat-drop at 13.0 landing; short warm resolve under the laugh.
Diegetic: footfalls on tile, crowd murmur, escalator hum, gate beep, door chime x3, train seal + pull-away rumble. Korean line only as written.

NEGATIVE: no subtitles, no on-screen text, no watermark, no logos, no readable station signage, no anime or CGI look, no face morphing, no duplicate JUNO, no extra or deformed limbs, no outfit change, no lighting drift, no direction flips (never right-to-left), no crowd faces in sharp focus, no floaty physics, no dead-air pacing.

Scene 3 — TORI · 시장 자전거 배달

① 오퍼스 4.8 버전

[SEEDANCE 2.0 · SCENE 4 "TORI — MARKET DELIVERY DASH"]
15s · 16:9 · 720p · 24fps · OBSTACLE-DENSITY ACCELERATION ARC

STYLE (locked, every frame):

Modern 3D CGI family-animation look — soft rounded appealing shapes, big expressive eyes, subsurface skin and fabric, warm bounce lighting, shallow depth of field, cozy warm golden-dusk market palette, gentle motion blur. NOT 2D, NOT anime, NOT photoreal, no style drift.

CHARACTER (locked): TORI per attached sheet — ~13yo, round friendly face, big bright eyes, warm tan skin, tousled black hair under a red ball cap worn backward, oversized delivery vest over striped tee, rolled cargo pants, worn sneakers, towel around neck. He rides a small delivery BICYCLE with the insulated warm-food box strapped to the rear rack. Same face + outfit every frame. The food box never spills.

CAMERA LOGIC: continuous forward ride through one market lane; each cut hands its END position to the next START (entrance → stalls → handcart → crates → awning rope → fish shop → steps → noodle shop). Obstacle density RISES every beat; tempo rises with it; only the final drift-stop slows.

BEATS (timecoded):

- 0.0-1.5 Wide burst at the market entrance: TORI checks the dusk sky (last-order soon), stands on the pedals and launches; camera drops in behind the bike. SFX: bell ring, chain whir.
- 1.5-3.0 Rear low tracking: straight-line acceleration down the stall lane, fabric awnings and hanging bulbs whipping overhead.
- 3.0-4.2 Side tracking: pops a wheelie to skirt around a parked handcart, vendor flinching, apples wobbling but not falling.
- 4.2-5.6 FPV weave: tight zigzag between stacked fruit crates, box tilting but held.
- 5.6-7.0 Low limbo: he ducks flat under a low awning rope without slowing, cap brim grazing it.
- 7.0-8.5 Wide: skids across the wet tiled floor by the fish stall, a fan of water spraying up, back wheel fishtailing.
- 8.5-10.5 High angle: bunny-hops the bike down a short flight of market steps, deep suspension compression on landing.
- 10.5-13.0 SLOW-MOTION peak: hard front-brake into a sideways drift stop right at the noodle shop, dust and warm dusk light kicking up around the wheels.
- 13.0-15.0 Hero low angle, real time: he swings the insulated box off the rack and holds it out with a wide grin, steam curling from the lid.
DIALOGUE (only line): "배달 완료!"
End frame: TORI left-third at the shop, warm bulbs bokeh behind him.

AUDIO: BGM INCLUDED — bouncy playful orchestral+marimba chase cue that accelerates with the obstacle density, quick stinger hits on the wheelie / limbo / hop, a rising swell into the drift, warm triumphant button on the grin. Diegetic: bike bell, chain whir, tire skid, water splash, market crowd chatter, sizzling wok, box lid clack.

Korean line only as written.

NEGATIVE: no subtitles, no on-screen text, no watermark, no logos, no readable signs, no 2D or anime look, no photoreal, no face morphing, no duplicate TORI, no extra or deformed limbs, no outfit change, no spilled food box, no lighting drift to night, no camera cut jumps, no floaty physics.

② 페이블 5 버전

[SEEDANCE 2.0 · SCENE 4 "TORI – MARKET DELIVERY RELAY"]

15s · 16:9 · 720p · 24fps · STEAM IS THE CLOCK: 김이 사그라들기 전에

STYLE (locked, every frame):

Modern 3D CGI family-animation look – soft rounded appealing shapes, big expressive eyes, subsurface skin and fabric, warm bounce lighting, shallow depth of field, cozy golden-dusk market palette, gentle motion blur. NOT 2D, NOT anime, NOT photoreal, no style drift.

CONTINUITY LOCKS (non-negotiable):

- THE CLOCK: a wisp of steam rises from the insulated box's vent. It visibly THINS across the run (full at 0s, half at 7s, barely a thread by 12s) – and must BILLOW back out when the lid opens at the end. Steam is the countdown and the payoff.
- TRAVEL VECTOR: TORI always rides LEFT → RIGHT; the noodle shop sits frame-RIGHT. Never flip direction.
- CHARACTER: TORI per attached sheet – ~13yo, round friendly face, big bright eyes, warm tan skin, backward red ball cap, oversized delivery vest over striped tee, rolled cargo pants, worn sneakers, towel around neck. He rides a small delivery bicycle, insulated box strapped on the rear rack. Same face/outfit every frame.
- THE MARKET IS AN ALLY: vendors don't block him – they HELP. Three assists, escalating: handcart pulled aside → hose lifted into a water arch → crowd parting. Warm faces, quick nods. This is a relay, not an obstacle course.

BEATS (timecoded):

- 0.0-1.8 Macro on the box vent: steam curling thick. TORI rings his bell ONCE – a vendor's answering call echoes down the lane – standing-pedal launch L→R.
- 1.8-3.4 Rear low tracking: straight-line acceleration under strings of hanging bulbs, awnings whipping overhead, steam wisp streaming behind.
- 3.4-4.8 ASSIST 1 – the fruit-stall auntie yanks her handcart a hand-width aside just in time; TORI ducks a quick bow of thanks as he threads the gap.
- 4.8-6.2 FPV weave through stacked crates flowing straight into a flat limbo under a low awning rope, cap brim grazing it.
- 6.2-7.8 ASSIST 2 – the fishmonger hoists his hose high, making a glittering water ARCH; TORI shoots under it, droplets bokeh in the dusk light.
The steam wisp is HALF now – the clock is running out.
- 7.8-9.6 High angle: bunny-hop down the stone steps, hard landing, box straining against the strap but held.
- 9.6-12.6 ASSIST 3 + PEAK – outside the noodle shop the small crowd parts like a curtain; SLOW-MOTION hard-brake drift into the opening, dust motes golden in the dusk. BGM ducks out – brake screech, one heartbeat.
- 12.6-15.0 Real time snaps back: lid OPENS – steam BILLOWS up thick and white

(made it hot), the crowd cheers, TORI grins wide.

DIALOGUE (only line): "배달 완료!"

End frame: TORI left-third, steam rising, hanging-bulb bokeh behind.

AUDIO ARCHITECTURE: BGM included – bouncy marimba+strings relay cue whose PERCUSSION IS THE MARKET: knife-chops, wok sizzle and vendor calls land ON the beat (diegetic sounds folded into the music). Bell motif call-and-response x2 (his bell → vendors' answering shouts). Full DUCK at 9.6 drift (brake screech + one heartbeat only), warm chord RELEASE timed to the steam billow at 12.6, cheer + button on the grin. Korean line only as written.

NEGATIVE: no subtitles, no on-screen text, no watermark, no logos, no readable signs, no 2D or anime look, no photoreal, no face morphing, no duplicate TORI, no extra or deformed limbs, no outfit change, no spilled or dropped food box, no steam fully dying out, no hostile/angry vendors, no direction flips, no lighting drift to night, no floaty physics, no dead-air pacing.

Scene 4 — YUNA · 빛속 면접 질주

① 오퍼스 4.8 버전

[SEEDANCE 2.0 · SCENE 3 "YUNA — INTERVIEW RUN IN THE RAIN"]

15s · 16:9 · 720p · 24fps · SPEED-RAMP ARC (rain slow-mo <-> real-time sprint)

STYLE (locked, every frame):

Lush painterly modern anime film look – hyper-detailed luminous rainy sky, soft volumetric god-rays through cloud, sparkling rain highlights, wet reflective pavement, vivid saturated cinematic color, delicate line art. NOT 3D, NOT photoreal, no style drift.

CHARACTER (locked): YUNA per attached sheet – neat shoulder-length black hair, earnest nervous eyes, slightly oversized black interview suit over white blouse, clutching a beige document folder to her chest, black flats, small shoulder bag, a folded clear umbrella. Rain-damp strands. Same face + outfit every frame.

The document folder is precious – she shields it the whole run.

CAMERA LOGIC: continuous forward run through the rainy district; each cut hands its END position to the next START (crosswalk → puddle → stairs → tower → revolving door). Signature RHYTHM = speed-ramps: time stretches on the raindrops, snaps back to real time on her footfalls. She never gets soaked – the folder never gets wet.

BEATS (timecoded):

- 0.0-1.5 Extreme slow-mo: the FIRST raindrop swells and splashes on the pavement; YUNA glances at her watch, jaw sets – time SNAPS to real speed as she bolts.
- 1.5-3.0 Tracking: sprinting through a crowd of umbrellas, canopies whipping the foreground, she ducks and weaves under them.
- 3.0-4.0 Tight on the folder and her face: she curls it tighter to her chest, rain streaking past, eyes fixed ahead – a beat of resolve.
- 4.0-5.5 Low angle: she slides around a spreading puddle, a sheet of water fanning up, neon reflections rippling; brief slow-mo on the splash.
- 5.5-7.0 Wide: the crosswalk signal blinks to red – she pushes harder as warm god-rays crack through the clouds, backlighting the rain.
- 7.0-8.5 Vertical follow: bounding up the tower's entrance steps two at a time, snapping her clear umbrella closed mid-stride.
- 8.5-10.5 Long lens: past the outdoor canopy, final straight – the glass revolving door ahead, spinning slowly.
- 10.5-13.0 SLOW-MOTION peak: she threads into the revolving door on the exact beat, a single last raindrop suspended just behind her heel before it can land on her – she made it in dry.
- 13.0-15.0 Interior settle: she stumbles into the calm marble lobby, smooths her hair, hugs the dry folder, catches her breath, and a small determined smile.
DIALOGUE (only line): "좋아, 할 수 있어."
End frame: YUNA left-third in the lobby, rain blurred on the glass behind her.

AUDIO: BGM INCLUDED – delicate emotional piano+strings that swells with the god-ray beat and lifts on the door entry, gentle resolve on the smile. Time-stretched whoosh on each speed-ramp. Diegetic: rain on pavement and umbrellas, splashes,

footfalls, umbrella snap, revolving-door glass hush, quiet lobby tone.
Korean line only as written. No other dialogue.

NEGATIVE: no subtitles, no on-screen text, no watermark, no logos, no readable signs, no 3D, no photoreal, no face morphing, no duplicate YUNA, no extra or deformed limbs, no outfit change, no fully soaked/dripping character, no wet ruined folder, no lighting drift to night, no camera cut jumps, no floaty physics.

② 페이블 5 버전

[SEEDANCE 2.0 · SCENE 3 "YUNA – RACE AGAINST THE RAIN"]

15s · 16:9 · 720p · 24fps · THE SKY IS THE CLOCK: first drops → patter → downpour

STYLE (locked, every frame):

Lush painterly modern anime film look – hyper-detailed luminous rainy sky, soft volumetric god-rays, sparkling rain highlights, wet reflective pavement, vivid saturated cinematic color, delicate line art. NOT 3D, NOT photoreal, no style drift.

CONTINUITY LOCKS (non-negotiable):

- THE CLOCK: rain density escalates in exactly 3 stages across the shot – stage 1 first scattered drops (0-4.6s), stage 2 steady patter (4.6-10s), stage 3 full downpour ONLY after she is inside (13s+). The storm is the countdown; she must beat the sky, not a watch.
- TRAVEL VECTOR: YUNA always moves LEFT → RIGHT; the glass tower and revolving door always sit frame-RIGHT. Never flip direction.
- CHARACTER: YUNA per attached sheet – shoulder-length black hair, earnest nervous eyes, slightly oversized black interview suit over white blouse, beige document folder to her chest, black flats, small shoulder bag, folded clear umbrella. Same face/outfit every frame.
- PROP ARC: the umbrella is NEVER opened – no time. She holds the folded umbrella angled OVER the folder as a makeshift rain shield the entire run. The folder stays dry to the last frame.

BEATS (timecoded):

- 0.0-1.8 Macro slow-mo: one raindrop lands on the back of her hand. She looks up at the bruised sky, reads it, tucks the folded umbrella over the folder – time SNAPS to real speed as she bolts left-to-right.
- 1.8-3.2 Tracking through umbrella crowd, canopies slicing the extreme foreground; scattered stage-1 drops sparkling in backlight.
- 3.2-4.6 Half-frame puddle reflection shot: her anxious mirrored self fills the lower frame – her flats STOMP through it, shattering the reflection into spray as she passes. Resolve, visualized.
- 4.6-6.2 Low tracking: shortcut under a bus-stop awning, bursting through the water curtain pouring off its edge – stage-2 patter begins.
- 6.2-8.0 Wide: crosswalk signal blinking its last green; god-rays crack between buildings as she sprints the crossing.
- 8.0-10.0 Vertical follow up the tower steps two at a time, umbrella-shield tight over the folder, thunder rolling – the sky about to break.
- 10.0-13.0 SLOW-MOTION threading into the revolving door; the last raindrop falls just behind her heel. AUDIO PRE-LAP: the muffled hush of the lobby

arrives a half-second BEFORE the picture cuts inside.

13.0-15.0 Marble lobby, real time: behind the glass at her back the stage-3 DOWNPOUR finally crashes down – one second late. She checks the dry folder, smooths her hair, breath settling into a small determined smile.
DIALOGUE (only line): "좋아, 할 수 있어."
End frame: YUNA left-third, downpour streaming down the glass behind her.

AUDIO ARCHITECTURE: BGM enters LATE – first 6 seconds are rain-only percussion (drops = the beat). Solo piano enters at 6.2 on the god-ray sprint, strings join on the stairs, everything DUCKS to near-silence for the 10.0-13.0 slow-mo (lobby hush pre-lap + single heartbeat), then a warm full-chord release as the downpour hits the glass at 13.0. Diegetic: rain stages 1→2→3, splash shatter, awning water curtain, footfalls, thunder roll, revolving-door glass hush.
Korean line only as written.

NEGATIVE: no subtitles, no on-screen text, no watermark, no logos, no readable signs, no 3D, no photoreal, no face morphing, no duplicate YUNA, no extra or deformed limbs, no outfit change, no opened umbrella, no soaked character, no wet folder, no downpour before 13.0, no direction flips, no lighting drift, no floaty physics, no dead-air pacing.
